EDUCATION

Drexel University

B.S. Computer Science coursework, 4+ years completed

Philadelphia, PA

September 2022 – September 2026

Relevant Coursework: Data Structures, Systems Programming, Databases, Artificial Intelligence

EXPERIENCE

Yoh, A Day & Zimmerman Company

System Administrator / Client: PJM Interconnection

Valley Forge, PA

March 2026 – September 2026

- Automated repeatable infrastructure workflows across **30+ RHEL 8/9 hosts** using **Ansible Automation Platform (AAP)**, replacing manual configuration tasks and improving deployment efficiency by **~25%**
- Integrated the **Cherwell ITSM platform** and **Halo API** with AAP via **Python**, enabling **dynamic inventory** that keeps host records accurate and up to date without manual intervention
- Validated **30+ production hosts** against PJM's internal **Ansible collection** and authored supporting documentation, ensuring **idempotency**, module reliability, and standardized, repeatable deployments

University of Pennsylvania School of Nursing

Information Technology Specialist

Philadelphia, PA

March 2025 – September 2025

- Served as frontline IT support for faculty and staff, resolving **50+ Tier 1 hardware, software, and network incidents per week** across **macOS** and **Windows 10/11** environments with an under 2-hour average resolution time
- Supported **live instructional and event AV** on **Crestron** systems, responding in real time to in-classroom incidents and reducing downtime by an estimated **20%**
- Standardized **device imaging and deployment workflows** through improved documentation and ticket-data analysis, reducing re-imaging errors by **~30%**
- Analyzed **5,000+ service ticket records** with **Python (Pandas)** and **SQL** to surface recurring issues, driving process improvements that cut repeat incidents by **~15%**

PROJECTS

Hiking Gear Recommendation App *Python, Flask, PostgreSQL, React, RESTful API, Render*

- Architected and deployed a **full-stack** web app (**Flask + React**) on Render, handling end-to-end requests from trip parameter input to gear output in under 500ms
- Designed a normalized **PostgreSQL** schema housing 180+ gear items across 9 categories; built **RESTful API** endpoints integrating real-time weather data to dynamically rank recommendations

Stock Trading Bot *Python, Pandas, OpenAI Gymnasium, NLP, AWS*

- Built a **reinforcement learning** trading agent with **OpenAI Gymnasium** trained on 5+ years of market data; deployed inference pipeline on **AWS** for live paper trading with automated daily performance logging

SKILLS

IT Support:	macOS, Windows 10/11, System Imaging & Deployment, Microsoft 365, Crestron AV, TCP/IP, Ticketing/ITSM (Cherwell, Halo)
Collaboration Tools:	Google Workspace, Slack, Jira, Confluence (Atlassian)
Automation & Scripting:	Python, Bash, YAML, Ansible, Ansible Automation Platform (AAP), SQL
Cloud & Systems:	AWS, Red Hat Enterprise Linux (RHEL), GitHub (CI/CD)
